

Erie County Association of School Boards

## “ECASB BUSINESS CONNECTIONS”

Solar Liberty is solarizing Western New York . Solar Liberty is involved with projects from the Town of Ripley to the Town of Tonawanda, throughout Erie and Niagara Counties, locally, and has recently surfaced at Barker Central school District, Fredonia State College in Chautauqua Counties and right here in Western New York at Iroquois Central School on top of the Marilla Elementary Building due to the passage of a capital project this past fall. In Barker, the Solar Panels are located on 4 acres of district property and will bring a savings of \$70,000 per school year. State Building Aid and the amount of electric that is returned to National Grid will lessen the districts energy expenses right out of the gate.

There are over 380 districts in New York State that have embarked on Solar Energy. NYS Solar incentives offer a profitable option to help insulate school districts from potential budget cuts. Solar Liberty is the largest and most experienced solar energy installer in Western New York and across New York State. The experienced team installs grid-tied solar electricity and battery storage systems for education, municipal, commercial, residential, nonprofit and community solar customers. Recognized as the “Top Solar Contractor” in New York State by Solar Power World Magazine, Solar Liberty is ranked #1. Solar Liberty makes going solar easy for customers and provides turnkey solar energy systems and solutions using the highest quality equipment and components.

### **Who We Are:**

- Founded in NYS in 2003.
- 3,000 Solar turnkey installations completed and accounting including 130+ schools.
- Recognized as the largest NYS installer by NYSEERDA, Department of Energy and Solar Power World.
- Our experience and size provides customers with the seamless and cost effective path to solar power in New York State.

### **Reasons to Go Solar:**

- Immediate Operational Savings.
- Alignment with NYS and Green Ribbon Objective.
- Sponsored clinics to educators to develop a solar curriculum.
- Demonstrate environmental leadership.
- Incentives have never been better in New York State.
