

“ ECASB BUSINESS CONNECTIONS ”

SuperEval®

PLS 3rd Learning/
Super Eval is based in
Buffalo, New York.

David Lowrey
ECASB Executive Director

I became familiar with PLS3rd Learning when I started teaching Graduate Level classes through the NYSUT ETP program. All 16 classes that I have been trained to teach are all PLS classes. They are research driven with practical activities that can be taken into the class the next day. When I found that PLS 3rd Learning / Super Eval had prepared Superintendent and Board Evaluations, I could not wait to experience them. They are of the same high quality that the graduate classes are that I have been trained in since 2000.

In 2015 PLS 3rd Learning, long time signature partner with New York State Council of Superintendents developed Super Eval Superintendent evaluation tool which supported the Council’s Superintendent Mode Evaluation Instrument. Since 2015, Super Eval has developed a suite of online evaluation tools for School Boards, Central Office Administrators, Assistant Principals, Building Level Administrators and Support Staff.

The District that utilizes the Super Eval evaluation tool for their superintendent, staff and board evaluation tools have many benefits that include:

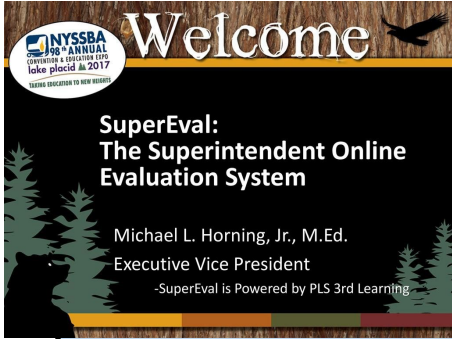

- The program archives historical data including past evaluations and artifacts.
- The system manages documents with no limit on storage. Documents can include images, videos, and audio files.
- In page instructions help the user to better help navigate the evaluation tool.
- There is access to training and education throughout the entire process. The ‘Help Desk’ is staffed with educators and developers to help with all needs.
- Through using the program, work time is cut in half with the use of pre-populated fields.
- The system utilizes auto generated forms and an electronic sign off with digital signatures thereby meeting the states legal requirement.
- The system allows the user to customize the evaluation rubric.

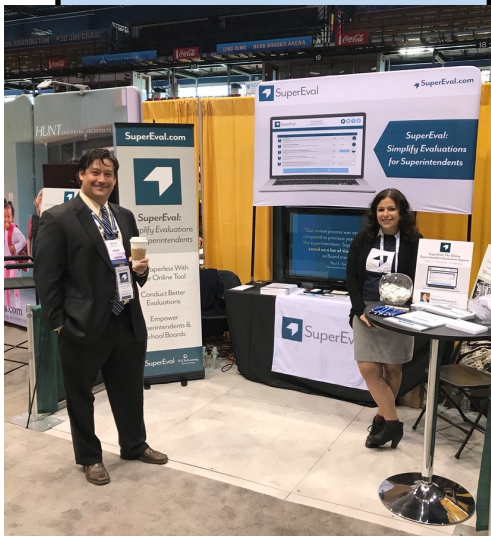

SuperEval®

Working Together, FOR YOU!

Super Eval is a frequent presenter at both the NYSSBA annual convention and national conventions.

Above: Dr. Michael Horning awaits visitors to the Super Eval booth at a convention. Below: Dr. Horning presents at the ASEA Summer Leadership Conference.

- The program is BOCES aide-able through a co-ser.
- Super Eval evaluation tools eliminate the carbon footprint of the school district and is a paperless system.

Super Eval is highly customized to support several NYS regulations in APPR. The program includes weighting levels for primary and independent evaluators. The program can be customized for cut score ranges and the inclusion of a student sorting matrix. The system is also 'Foil Compliant'.

The use of Super Eval allows for Superintendents, School Boards and both building level and central office administrators an avenue to employ reflective practices to gain new insights and uncover new knowledge that leads to innovative ideas. Professional Learning and Development is the result of purposeful leadership evaluations created by Super Eval. Super Eval allows school leaders to put together a reflective portfolio of their own work and align that work to what leadership really means.
